CRISTINA LUCENA PALOP

BIOMEDICAL ENGINEER

Madrid, Community of Madrid, 28001, Spain | crlucenap@gmail.com | (+34) 644373536 | LinkedIn

Biomedical Engineering graduate passionate about healthcare data and analytics, with experience in biomechanical data processing, statistical analysis, and software development. Skilled in Python, SQL, and R, with knowledge of machine learning fundamentals and database management.

PROFFESIONAL EXPERIENCE

Biomedical Engineer, GEE Young Talent Programme **Oct 2026 to Present**

Madrid, Spain

9-month rotation programme across hospital and corporate environments. Started with a hands-on placement in the electromedicine workshop at Hospital Universitario de Getafe, gaining practical experience in the maintenance and management of medical equipment in a real clinical setting

Biomedical Engineering Intern, Center of Automation and Robotics, CSIC **Mar 2025 to May 2025**

Madrid, Spain

Processed and analyzed biomechanical gait datasets using Python-based workflows. Developed data processing scripts for gait analysis on irregular terrains. Worked with structured kinematic datasets to support analysis and visualization.

Clinical Rotations, Hospital Universitario Fundación Jiménez Díaz **Jan 2025 to Mar2025**

Madrid, Spain

Analyzed clinical workflows and the use of medical technologies across multiple hospital departments. Identified operational improvement opportunities and presented two optimization proposals focused on healthcare processes and efficiency.

Camp Counselor, Ecocampamento Fundágora y Vaughan **Jul 2022 to Jul 2025**

Madrid and Guadalajara, Spain

Led and coordinated group activities for children aged 6–14 in a fully English-speaking environment, developing strong communication, teamwork, adaptability, and organizational skills.

EDUCATION

Postgraduate studies in Robotics Oriented to AI; Tokio School, Spain **2025 to 2026**

Bachelor's degree in Biomedical Engineering **2021 to 2025**

Universidad Autónoma de Madrid, Spain

Bachelor's Thesis; Development of an application for teleassistance in obstetric emergencies within the 'Ángeles de Guardia' program.

Healthcare Data Standards course; Better Hive **2026**

Scrum Manager **2026**

Scrum Master. Specialized training in the use of the Scrum framework for agile project management.

TECHNICAL PROFICIENCIES

Python Data Processing: Advanced proficiency in **Python** demonstrated through coursework in ML fundamentals, biomechanical data processing at CSIC, and **AI model development** in hackathon project.

SQL & Database Management: Proficiency in **SQL** for database querying, manipulation, and optimization. Practical experience with database design and management from coursework and final thessis project.

Data Analysis: Experience with **R Studio** in biostatistics coursework and **MATLAB** for data analysis. Practical knowledge of data processing, visualization, and statistical analysis.

Cloud & Backend Development: Experience developing an Alexa-based teleassistance application using **Node.js** and Amazon Web Services (**AWS**) as part of final thesis project. Worked on backend logic integration, conversational workflows, and healthcare-oriented software solutions.

Version Control: Certified in **Git** version control from Microsoft and collaborative development practices.

LANGUAGES

Spanish: Native

English: Full professional proficiency

French: Basic proficiency

ADDITIONAL PROJECTS

24th Boehringer Ingelheim Hackathon (2024)

Development of an AI-powered model designed to detect pulmonary fibrosis in CT images.

Introduction to Git Microsoft certification (2025)

Completed training on Git fundamentals, including branching, merging, and repository management.

Java from zero to expert Edutin Academy certification (2025)

Training in object-oriented programming with Java, including classes, data structures, exception handling, and software development fundamentals.

Tokio School Masterclass Series – Business, Technology & Industry Skills (2026)

Participation in a masterclass series covering professional development in business and technology, including entrepreneurship, communication, Apache Spark, APIs, CI/CD, cloud and software development practices among others.
